Software Outsourcing

China is rapidly becoming a favorable location for the offshore software outsourcing work. Its fast growing capacities of IT manpower guarantees the long-term availability of high-caliber talents at competitive price. iASPEC has successfully positioned itself as one of the pioneers of software outsourcing business in the region by tapping into these talents and combining them with Hong Kong's international business practices, domain expertise, robust legal system, software design capabilities, quality management and project management skills.

Since 1993, iASPEC has been operating one of the most successful software development centers in mainland China focusing on software outsourcing work. It has since then expanded its software outsourcing centers into the cities of Shenzhen and Zhuhai.

The following are some of the outstanding values provided by iASPEC in the international Software Engineering Outsourcing services:

- ◆ Flexible Software Outsourcing Engagement Models Customized to Meet Customer Needs
- ◆ Proven Software Engineering Methodologies and Processes
- ◆ High Standards of IP Protection and Security Measures enforced in these Centers
